the Suffering Farming Families have
a chance to beat Cancer.

The Hospital Project

Bhai Kanhaiya Sevapanthi Hospital

There is a Cancer Epidemic ravaging villages and towns in Southern Punjab, especially the districts of Bathinda, Mansa, Muktsar, Sangrur and Patiala. Farmers are losing their farms as well as their homes, trying to pay medical bills for their ailing loved ones. The mortality rate of cancer patients in the area is 71.4% as the afflicted become aware of their condition in very late stages, due to lack of diagnostic facilities as well as affordable treatment facilities. They have to travel to Bikaner, Rajasthan, on Train No 339, now known as the 'Cancer Train' for a 750 km round trip journey. The ground water, as a result of the 'Green Revolution' is now contaminated with deadly pesticides, as well as Uranium and Arsenic. In the Talwandi Sabo Area, there are reservoirs that were tested and contain up to 50000 times the safe limit of Uranium as defined by EPA. There are instances where all ten members of a family have Cancer. Some RO units installed by the Punjab Government do not remove any radio-nuclides from the water, and the poor rural population is not even aware of the dangers.

Mahant Sahib is leading an effort to construct a modern Multi-Specialty Hospital with a well equipped **Cancer Center** with 150 beds on a 7.25Ac plot of land in Aklia Kalan village, on the Bathinda-Jaito road. We wish to start by buying a mobile cancer screening unit to be sent to villages regularly to provide diagnostic facilities to the poor farmers.

In addition to the Cancer Center this Hospital will also contain the Mahant Tirath Singh **Eye Care Center** as well a state of the art **Dental Care** department, which will regularly screen candidates for a free cornea transplant.

There will also be a modern **Obstetrics** and **Gynecology** department as well a Pediatrics Department to care of the needs of local families.

The hospital will also have a well equipped **Out Patient Department**, where we hope to serve hundreds of patients every day, as well as a **state-of-the-art Diagnostic Lab** and a **Trauma Center**.

In order to further support the local farming families, we wish to add a first class Nursing College to this

facility to train women from these villages and provide a source to income for families and remedy the shortage of qualified nurses in the area. This entire Multi-Specialty Hospital and College has been estimated to cost about Indian Rupees 150 Crores (about 24 million U. S. Dollars, when all the phases are completed including the Nursing College.

Our focus initially will be on early diagnosis of ailments to prevent unnecessary deaths, for which our first phase of development will the Outpatient Department fully equipped with a diagnostic Lab along with a Mobile Screening Unit and an Ambulance. The cost of this phase is estimated at about Indian Rupees 1.6 Crores or about US Dollars 260,000. Even if we can save 75-100 lives every month with this Phase I, we will consider it a big achievement. We expect this Phase to be completed by the end of 2015.

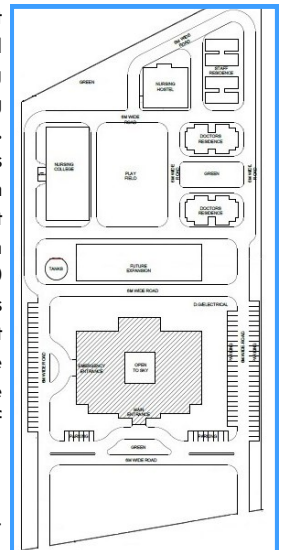

Progress Report

All soil testing and inspections have been completed.

Our application for land-use transfer is pending with the authorities, awaiting an NOC from the Public Works and the Forest Department.

To further save costs, we are re-designing the hospital to maximize use of Solar Energy, to reduce landscaping on upper floors, and to reduce the total square footage by about 28 pct. This will allow room for future expansion.

Our fundraising is up, locally, and we hope to raise awareness of this project internationally, this year, via two new websites and printed literature. We hope to raise about \$2,000,000 in 2015.

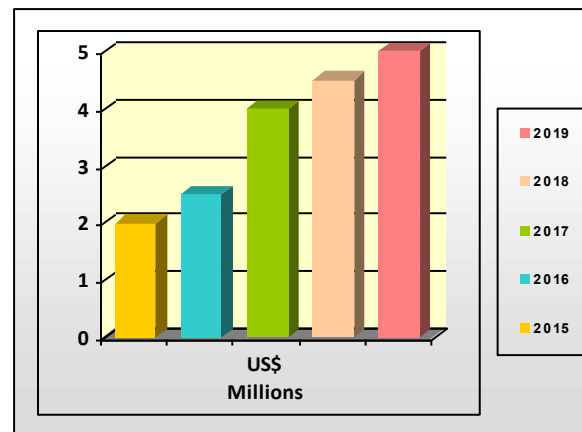

HOSPITAL SITE PLAN

Sevapanthi Hospital Trust

OUR FUNDRAISING EFFORT

This a joint effort by Bhai Kanhaiya Charitable Trust based at Tikana Bhai Jagta Ji, Goniana Bhai Jagta, in District Bathinda in Punjab and Justice Gopal Singh Charitable Trust based in Neeti Bagh, New Delhi. The two institutions have focused their attention

on four groups of donors.

1. The Corporate Sector in India, Great Britain and the United States, where we reach out to the corporate leadership. We also aim to reach out to large international financial institutions and to large healthcare companies who can donate medical equipment
2. Non Resident Indians, especially in the United States, Canada, Great Britain and Australia.
3. The devotees of Tikana Bhai Jagta Ji in Punjab, Haryana, Delhi, Bombay and the rest of India and contributors to Justice Gopal Singh Trust.
4. All Sikhs living in India and abroad.

Our goal is to complete this project within 5 years and hopefully a lot sooner. The Sevapanthi Hospital Trust has been qualified under Sections 12A and 80 G of the Indian Income Tax Act of 1961.

THE ORGANIZATION

Sevapanthi Hospital Trust was created in March 2014 as a joint effort by Bhai Kanhaiya Charitable Trust and Justice Gopal Singh Charitable Trust, to facilitate the construction of the Bhai Kanhaiya Sevapanthi Hospital in Goniana Mandi. Bhai Kanhaiya Charitable Trust was formed in 1994 and has been operating the charitable hospital, organizing free medical camps in Goniana Mandi since then and providing food and clothing to the poor. Justice Gopal Singh Trust has been involved in the health segment since 1975. The trust has been running general and specialist OPDs for weaker sections of the society in Delhi, Gurgaon and Pataudi. They also have organized a Mobile Medical Service for senior citizens who are unable to visit a doctor.

THE LEADERSHIP

The Sevapanthi Hospital Trust is in the able hands of the Chairman, Mahant Bhai Kahan Singh Ji, the Chief Preceptor of the Sevapanthi Samprada, an order of sants within the Sikh faith, which has been serving humanity without any discrimination whatsoever for the last 300 years. This humanitarian organization of holy men of the Sikh faith was formed 160 years before the Red Cross, by Bhai Kanhaiya Ji, a devout Sikh who was blessed by both, the Ninth and Tenth Sikh Gurus. Mahant Kahan Singh Ji is the thirteenth Spiritual descendant of Bhai Kanhaiya Ji and is already managing and leading several schools, colleges, dispensaries and hospitals. He has been a leader in providing free medical and dental care to the poor in the region by organizing free dental care camps, cornea transplant surgical camps, and cancer screening camps all year. The Executive President of the Trust is Hon'ble Shiv Narayan Dhingra, Retired Chief Justice of the Delhi High Court, who also heads Justice Gopal Singh Charitable Trust, which has been efficiently running OPDs and charitable hospitals in New Delhi and Haryana.

THE PLAN

Our plan is to build a 150 bed multi-specialty hospital with a modern cancer center and a Nursing College to serve 4 districts in Southern Punjab, which are Bathinda, Mansa, Muktsar and Faridkot, and a population of about 4 million. These are districts that are the most affected by the Cancer epidemic. We expect to build this hospital in 3 phases. **PHASE 1:** We will build a Out-patient Department that will provide specialty medical care and minor surgical procedures. We also expect to have 2 Ambulances and one Mobile Cancer Screening Van that will visit 40-50 villages in the region and screen patients to aid in early diagnosis.

PHASE 2: A Tertiary Care Facility with 150 beds will be built that will provide an Emergency Room/Trauma Center, a state of the art Diagnostic Lab, Operation Theaters, ICUs and NICUs, a state of the art Cardiac Center, a Mother and Child care department and other specialty departments including , Dental care , Eye Care, E.N.T., and Urology, Gastro-Intestinal, Neurology, Nephrology, Orthopedics, Respiratory Care among others.

PHASE 3: A modern Nursing College with 150 seats that will educate young women from rural areas to become nurses and will also strive to provide placement services for the graduates.

EXPANSION PLANS: We hope to add specialties and enhance the number of beds in this hospital to about 400 in the coming years. We also plan to add advanced medical equipment in order to attract patients from the entire state as well as neighboring states like Haryana and Rajasthan.

A Linear Accelerator for Radiation Therapy treatment for Cancer patients

MAJOR EQUIPMENT NEEDED

Some of the equipment needed for the hospital is very expensive and is listed for donors who can donate equipment.

1. Two Linear Accelerators
2. A 16 or 32 slice CT-Scan and Simulator
3. A 1.5 Tesla MRI Scanner
4. Two Mobile Cancer Screening Units.

An MRI Scanner
